Create Social Distancing Layouts – Classroom Seating Configuration

This Guide will give you an overview of how to use the Auto Layout tool to quickly copy and place items in a classroom type seating configuration.

- 1. Use the menu bar to navigate to the Items you would like to layout. For example: 6 foot buffer, chair, and person sitting.
- 2. Click "Select" from the tool bar (make sure to click the dropdown next to "Select" to ensure the Items are being selected).
- 3. Click and drag to draw a box around all items you would like to group to Auto Layout.

4. Select Auto Layout from the properties window.

- 5. Select the approximate Number of Items per Row and Number of Rows.
- 6a. Select Standard Layout.
- 7a. Given that the social radius buffer is one of the items you selected and the spacing is from the edge of the items, set the Horizontal and Vertical Spacing to 0 feet.

- 6b. Select the Staggered layout.
- 7b. Ensure "Space Evenly" is on and type in the required physical distance between people (i.e., 6 feet), as the distance on the Staggered layout is from the center of the item.
